

16 NORTH SEPARATION PROJECT OPEN HOUSE

GMP HALL

350 HUDSON AVENUE

JULY 24TH AT 5:30 PM

Come and join the project team to learn and ask questions about the 16 North Separation Project. The Project involves separating the sewer and stormwater collection systems. Separation will replace aging infrastructure and improve the environment by reducing sewer overflows during large rain events. The Project is currently in the 95% design phase.

Join Us at the Open House

Project Background and Objectives

Learn why the project is necessary and understand your existing neighborhood sewer system.

Design and On-Going Field Work

Members of the project team will discuss the current design plans and describe the intent of on-going field work.

Community Impacts

Get an update on the Project schedule and the Community leave behinds.
