

CITY OF NEWARK

DIVISION OF WATER AND WASTEWATER

The City of Newark now offers an online option to sign up for a “Free” water service line replacement. Simply follow the QR code below to access the online survey and start the process.

After completing the survey, a City representative will contact you to verify service line material and schedule the replacement. A photo of the water line can be uploaded within the survey to assist City staff with material identification.

Please only submit one survey per house. The information collected will be used solely by the City of Newark. Submitting the survey as the property owner grants permission for the City of Newark to perform the replacement. Water lines made of lead and galvanized steel qualify for replacement.
